Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 27-34, 50-55 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is not clear whether applicant is claiming a method of manufacturing a substrate or a substrate, since there is no method step in the claim. Applicant is only claiming a substrate. If however applicant wants to claim a method of manufacturing, applicant must provide the method steps.

Claim 50 is indefinite for depending on method claim, since claim 50 is an apparatus claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 35-55 are rejected under 35 U.S.C. 102(e) as being anticipated by Vyakarnam et al (6,333,029).

With respect to claim 35, Vyakarnam et al discloses a method of producing implantable substrate for the healing and/or protection of connective tissue, the method comprising bringing a structure and one or more biologically active factors into contact wherein the at least one structure comprises one or more constituent selected from the group consisting wool; a cotton wool-like material; asset forth in column 14, lines 47-52; fibers comprising ceramic material; asset forth in column 6, lines 27-30; and the one or more biologically active factor; as set forth in column 6, lines 46-54, column 9, lines 1-5.

With respect to claims 36-55, the method steps, as set forth would have been inherently carried out in the production of the substrate, as set forth above; and as set forth in column 4, lines 30-35, column 5, lines 44-48, column 6, lines 27-29, lines 46-53, column 8, lines 55-61, column 14, lines 47-55, column 15, lines 30-40, column 17, lines 25-53; and as best seen in the FIGS.

Response to Amendment

Applicant's arguments with respect to claims 27-55 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

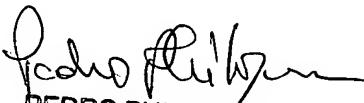

A shortened statutory period for reply to this action is set to expire THREE MONTHS from the mailing date of this action.
